Bangalore, India

Summary

Computer Science undergraduate at **Dayananda Sagar University** (B.Tech, CSE, 2023–2027) with backend-focused internship experience at **Tetherfi**. Comfortable with **C Programming**, **Python**, **JavaScript**, **SQL**, and working with **.NET Core** and **MariaDB**. I enjoy building systems like smart caching reverse proxies, GPU schedulers, and interactive frontends, with a focus on clean code, performance, and learning industry-standard development practices.

Education

Dayananda Sagar University **2023 – 2027**
Bachelor of Technology (B.Tech), Computer Science Engineering *Bangalore, India*

Jyothy Composite PU College **2021 – 2023**
Senior Secondary (PCMB), Karnataka State Board *Karnataka, India*

Skills

Programming: C Programming, Python, JavaScript
Backend / Platforms: .NET Core, Web Development
Databases: SQL, MariaDB
Tools & Workflow: Git, GitHub, VS Code, basic Linux
Other: Problem Solving, Communication, Team Collaboration

Projects

CodeClash – Animated Frontend Experience | React, Tailwind CSS, GSAP **2025**
- Built a highly interactive, animation-driven frontend using **React**, **Tailwind CSS**, and **GSAP**.
- Implemented smooth page transitions, scroll-triggered animations, hover effects, and fluid micro-interactions for an immersive UI experience.
- Designed the project as a polished landing experience showcasing modern motion design and reusable UI components.
- Repository Link

Smart Caching Reverse Proxy (SCRP) | Node.js, Express, Redis, WebSockets, React **2025**
- Developed a reverse proxy that detects identical concurrent API requests and collapses them into a single optimized backend call.
- Used **Redis** for short-lived caching and in-flight request deduplication, significantly reducing redundant backend traffic and latency.
- Built a real-time React dashboard to visualize live traffic, cache hits, and performance metrics for demos and debugging.
- Repository Link

MAC Reimagined – Modern Redesign of Apple's Website | React.js,Three.js **2025**
- Developed a fully responsive and immersive redesign of the Apple Mac website with smooth animations and high-fidelity UI interactions.
- Utilized **GSAP** and **ScrollTrigger** for advanced motion effects, enhancing product showcase experience.
- Integrated a **3D Mac model using Three.js** for interactive device visualization in-browser.
- Built modular React components with Tailwind CSS for scalable and maintainable front-end architecture.
- Repository Link

AI Resume Analyzer – Automated Resume Evaluation Tool | JavaScript, Puter.js, Node.js **2025**
- Built an AI-powered resume evaluation system using **Puter.js** to process user-uploaded resumes directly in the browser.
- Implemented NLP-based analysis to extract skills, experience, and key sections from PDF/DOCX files.
- Generated real-time scoring, ATS compatibility checks, and improvement suggestions with a clean UI.
- Designed modular components for parsing, scoring, keyword extraction, and industry match evaluation.
- Repository Link

Work Experience

Tetherfi **2025**
Software Intern *Bangalore, India*

- Assisted in developing and maintaining backend services using **.NET Core**, focusing on clean, well-structured APIs.
- Worked with **MariaDB/SQL** for schema design, writing queries, and integrating data-driven features into applications.
- Collaborated with senior engineers on debugging, testing, and feature implementation, gaining exposure to production workflows.
